*Wood, Concrete, Metal, Shingles, Sheetrock, Cardboard, Glass, Plastic,
Pallets, Doors and Windows*

Call Myers Recycling Center today for a FREE, onsite evaluation of your project at

655-4312

We will accept all debris from any construction and demolition site
from a bathroom fit up to tearing down an entire house.

Our Mission

We seek and utilize emerging technologies to efficiently and safely recover all raw material value from the construction and demolition waste stream, knowing that the recycled byproducts we produce will be reused to create renewable energy or to build new roads, homes, schools or businesses in our communities. What would have been buried in the landfill yesterday, will now be used to build our children's future, create new jobs, and lessen our country's dependence on foreign oil.

DON'T WASTE OUR RESOURCES RECOVER THEM!

Myers Recycling Center is committed to providing unparalleled service to our customers:

Convenience- Separation is never required. Upon arrival, our equipment and trained personnel will quickly process and recycle your commingled loads and have your back on the road in minutes.

Maximum LEED Points- Myers recovers up to 85% of the raw material value from an average jobsite container of commingled C & D Debris assuring you of the maximum LEED points needed for your building's certification.

Fully Compliant- Complete monitoring of your waste stream, conducting load inspections by trained personnel, maximizing diversion & recovery, maintaining training and certifications, providing accurate reports.

MATERIAL	RECOVERY METHOD	SECONDARY MARKET
Asphalt, Brick, Concrete	Segregate by size and then hand-picked	Crushed and used as road base
Wood	Segregated by size and type, then handpicked	Chips are used to manufacture plywood and other wood products
Metals	Segregated and handpicked	Sent to metal reclaimers to be melted down and used as raw material
Gypsum	Segregated and handpicked	Material is crushed and the powder is used in various recycled products
Cardboard	Segregated and handpicked	Recycled by paper mills and used as raw material
Plastics	Segregated and handpicked	Recycled by paper mills and used as raw material
